CS33 Homework Assignment 7

11:59pm October 29, 2020

1. We covered the *sigsetjmp* and *siglongjmp* functions in lecture (Slides XVIII-26 and XVIII-27). The *sigsetjmp* function saves some information in the *sigjmp_buf* data structure so that the caller's context can be restored following a call to *siglongjmp*, resulting in *sigsetjmp*'s returning a second time. What information is saved?
